# ePoster session instructions

## Essential information

ePosters must be submitted in advance through our dedicated online submission platform. All presenting authors will receive personalised invitations to this platform.

Participants may be using handheld recording devices/livestreaming to the internet during sessions. If you have any concerns regarding permissions, please address these at the beginning of your presentation. All submitted ePosters will be added to congress app and uploaded to the congress archive at a later date.

## Format requirements

ePosters should be saved as a PDF, on a single page and in A0 format, portrait orientation. We recommend you use Office 2019 or earlier version.

Image files need to be inserted into the poster using the PowerPoint Insert function. You cannot use videos or moving images.
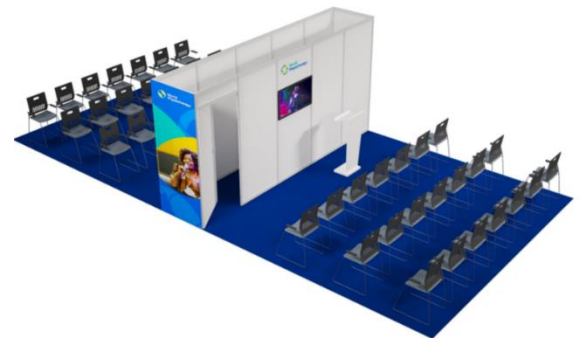

## Preparation on site

All ePoster presenters should meet their co-presenters at the ePoster area **ten minutes before the start of their session.**

## ePoster session area

There are four ePoster session areas in the exhibition hall labelled A-D.

The session chair will lead through five ePoster discussions in each 25-minute session. Each author will present their poster displayed on the screen in the pre-established order.

## Contact details

Add your contact details so that people can follow up with you for more details. If you are on social media add your details and remember to post about session. It's also a great way to connect with the global physiotherapy community and remember the hashtags #WorldPhysio2025 for the congress and #GlobalPT to connect with physiotherapists around the world.
